## PROFESSIONAL SUMMARY

Dynamic and results-driven Full-Stack Software Engineer with extensive experience in architecting, developing, and deploying high-performance web applications. Expert in the JavaScript and TypeScript ecosystems, with a proven track record of delivering scalable digital products from conception to deployment.

Proficient in building robust CLI tools, libraries, and enterprise-grade mobile and web applications. Strong expertise in distributed systems, API design, and cloud infrastructure, always prioritizing clean code, security, and developer experience.

## WORK EXPERIENCE

### Chief Technology Officer & Co-founder April 2023 – Present

Twinku Lagos, Nigeria

- Spearheading technical strategy and architectural vision for a fintech platform, aligning technology investments with business growth objectives.
- Leading a cross-functional engineering team, fostering a culture of technical excellence through mentorship and robust code review processes.
- Architecting and maintaining a suite of digital products, ensuring high performance, security, and scalability across the full stack.
- Leveraging emerging technologies to optimize development workflows and enhance product features.

### Full-Stack Software Engineer Nov 2021 – March 2023

CINSOL - Creative Innovations for New Solutions Lagos, Nigeria

- Designed and developed bespoke software solutions for diverse sectors, focusing on scalable web architectures and intuitive user experiences.
- Managed end-to-end delivery including database design, cloud hosting, and CI/CD pipeline implementation.
- Championed code quality through rigorous unit testing and automated integration flows, significantly reducing production vulnerabilities.

## Web Developer Nov 2020 – Oct 2021

Dukadan Oil and Gas Nigeria Ltd Lagos, Nigeria

- Developed and maintained web applications to streamline operations within the oil and gas sector.
- Implemented responsive front-ends and secure backend APIs to support real-time data tracking and operational reporting.

## Full-Stack Developer Feb 2017 – Nov 2019

Model Hub Solutions Lagos, Nigeria

- Collaborated on the full lifecycle of digital products, contributing to UI/UX design, front-end development, and architectural planning.
- Built and documented robust APIs and backend services, ensuring seamless integration with consumer-facing components.

## TECHNICAL SKILLS

**Languages:** JavaScript (ES6+), TypeScript, Go, Python, Rust, Solidity

**Frontend:** React.js, Next.js, Vue.js, Tailwind CSS, HTML5, CSS3

**Backend:** Node.js, Bun, GraphQL, REST APIs, Go, Deno

**Databases:** PostgreSQL, MongoDB, MySQL, SQLite, Neo4j

**DevOps/Tools:** AWS, Digital Ocean, Vercel, Netlify, Docker, Git, CI/CD, Jest

## FEATURED PROJECTS

**Sqlmig8:** High-performance CLI tool for automated database migrations, optimized for developer productivity.

**Paystack SDK:** Cross-runtime TypeScript SDK for seamless payment integration across Node.js, Deno, and Bun.

**MoBa Banking:** Secure PWA banking application with real-time transaction processing and advanced account management.

**Rkommend:** An automated recommendation management system for students and faculty, streamlining overseas study application processes.
